Model CMCP550114

The Circ-Master provides 24 hour recirculation with a higher GPM for increased heat efficiency and up to four times the filtration. Permanently lubricated ball bearings extend the motor life for the continuous-duty operation, along with the carbon-graphite, self-lubricating seal.

These performance curves are a result of in-lab testing using 2" suction line, actual performance may vary based on manufacturing tolerances and application.
